## CONNECTOR CATALOGUE

NANABOSHI ELECTRIC MFG CO., LTD

株式会社 七星科学研究所

# Foreword

The communication network system that supports advanced information society sees rapidly advancing technological innovation and electronic equipment such as computers and automated equipment that play the central role in the network system show remarkable advancement. In response to an increasing speed and capacity of information communication, electrical connections have come to play a more important role and become more complicated and sophisticated such as seen in unitization of equipment. Make them compact in orderly manner, control safety and build smooth flow of information; these are the roles of connectors. Since its establishment in 1943, Nanaboshi Electric Mfg. has been a reliable partner of users and promoted an expansion of product lineup, not to mention quality control. We put our capability and resources in supporting ever developing information society to further advance technological innovation.

## Creed

With Our Whole Heart

## Management Policy

To ensure eternal prosperity of Nanaboshi Electric Mfg., preserve the global environment and contribute to the development of society, we have set up the following as our management policy:

1. Create reliable products with customers' heart kept in our mind.
2. Keep creativity and value the spirit of inquiry to develop products that are appreciated by customers.
3. Maintain the spirit of better, faster and more reliable to cultivate our creativity and originality.
4. Keep our hearts connected and turn over a new leaf each day to create a worthwhile work environment.
5. Value global resources and energy and never lose our attention to environment in developing and making products.

Certified:

Tokyo: Nakano Head Office

Saitama: Sayama Factory

Advantages of using connectors

**Safety**  
**Operability**  
**Economy**

- ▶ Connectors provide reliable electrical connection.  
Connectors ensure proper wiring.
- ▶ Connectors are repetitively detachable and attachable.  
Connectors make equipment-to-equipment connection easy.
- ▶ Connectors enable the unitization of devices.  
Connectors facilitate maintenance and inspection.  
Connectors shorten work time.

**Please read prior to use.**

The information contained in this catalog is subject to change without notice for the purpose of product improvement.

The drawings and photos that appear in the catalog show only the representative products in the applicable product category. When you require more information, please contact us.

**Note: The dimensions shown in the catalog are standard dimensions. For details, please contact us and request necessary specifications and drawings.**

It is prohibited to reproduce, duplicate, transfer, store on tape or in a file this document in whole or in part without our permission to an extent exceeding the scope allowed by the Copyright Act.

### 【 CE Marking 】

The CE Marking applies to finished products and devices to indicate that they comply with the European safety standards. This CE Marking is not applicable to connectors that are electrical & mechanical components.

### 【 EU RoHS 】

The compliance of EU RoHS subject ten substances ( mercury , lead , hexavalentchrome , cadmium , PBB ,PBDE , DEHP , BBP , DBP , DIBP ) enacted from July 2019 will correspond from production in July 2018.

### 【 RoHS Directive 】

The RoHS Directive has been established by the EU ( European Union ) with an objective to protect human health and define collection and treatment of electrical and electronic equipment that does not affect environment by unifying laws and regulations concerning the restriction of use of harmful substances in electrical and electronic equipment among EU member countries.

The Chinese version RoHS Directive that has come into force in the People's Republic of China covers the same substances as the EU-RoHS Directive but there are some differences such as the obligation of indication of information about contained substances.

Our RoHS Directive compliant product types are those that are compliant with the EU-RoHS Directive, but not with the Chinese version RoHS Directive.

# Precautions

## 1. When Selecting Connectors

- (1) Select a connector that meets your voltage and current requirements.
- (2) Select a connector that is suitable for the method of use, place of use and operating environment.
- (3) Select a connector that has a socket contact incorporated on the power supply side.
- (4) Select a waterproof cable packing that is suitable for the finishing OD of the cable to use.  
( The waterproof connector is waterproofed when coupled. )
- (5) Select a cable of structure that does not damage the close contact with the cable packing ID part when the cable clamp ( clamp nut ) is tightened.

## 2. When Installing Connectors

- (1) Prior to starting connection work, be sure to read and understand the "wire connecting method."
- (2) Do not heat the contact more than necessary.
- (3) Never modify the connector. A modified connector may lose its intended performance.
- (4) Do not use the connector in such a way that undue force is applied to the connections.
- (5) Show the precautions listed in the following "3. When Using Connectors "in instruction manuals of associated equipment as needed.
- (6) Install connectors so that they will not suffer undue loading by the weight of cables.

## 3. When Using Connectors

- (1) Be sure to use the connector within its rated capacity.
- (2) Never insert or extract the connector when energized. Such a practice is very dangerous.
- (3) Never insert or extract the connector with wet hands. Such a practice is very dangerous.
- (4) When coupling the connector, always check the guide position and never apply undue force.
- (5) Insert and extract the connector straight.
- (6) Do not use the connector with damaged insulator or cover.
- (7) Do not use the connector with deformed or damaged contact.
- (8) Do not insert a foreign matter or a pin contact having a different OD into the socket contact.
- (9) The connectors are constructed with projecting or exposed threads. When handling the connectors, exercise caution so that your hands will not be cut by them.
- (10) When the connector is not coupled, use a cap to protect its contact.
- (11) When inserting or extracting the connector, do not turn the connector body.
- (12) Do not apply undue force to the connector.
- (13) Our products have no compatibility with other maker's products.

The guarantee is not applicable to any trouble incurred by connecting our products with other maker's products.

## 4. When Ordering Connectors

- (1) When a quality assurance program exists that is specific to a particular industrial field where connectors are to be used, or when connectors are to be used in advanced applications such as nuclear power control systems, aerospace equipment, submarine relay and medical life support instruments, equipment and systems, please consult with us in advance.

When using products listed in this catalog, follow the laws and regulations that apply to your purposes of use of connectors.

# Shapes and Combination of Connectors

## Contact shapes

- There are two types of contacts incorporated into a connector male shape and female shape.

Pin ( male shape ) contact		M ( e.g. : PM , RM , AdM )
Socket ( female shape ) contact		F ( e.g. : PF , RF , AdF )

**< S Type >** A group of plugs with socket (female) contact incorporated and receptacles and adapters that couple with them.

Shape

- Plugs with socket ( female ) contact incorporated ..... P , PF , LP , LPF , GP , GPF , SP , SPF , PFK
- Receptacles with pin ( male ) contact incorporated ..... R , RM , R kaku , CRM , RBM , RBP
- Adapters with pin ( male ) contact incorporated ..... Ad , AdM , Ad(F) , Ad(F)M , AdMK , Ad(F)MK , GAd , GAdM , GAd(F)M

**< G Type >** A group of plugs with pin ( male ) contact incorporated and receptacles and adapters that couple with them.

Shape

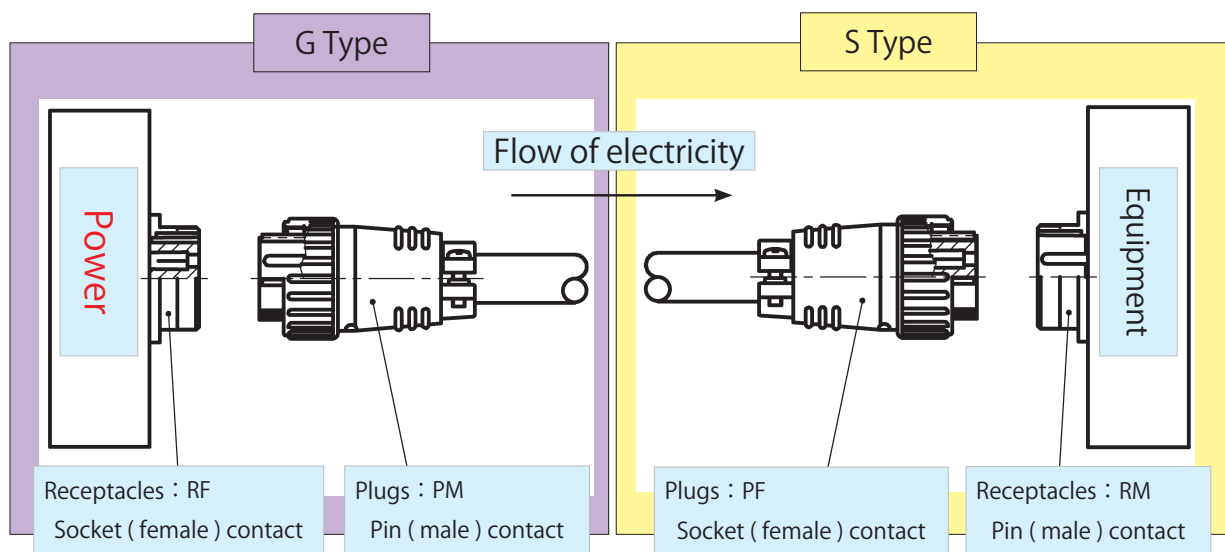

- Plugs with pin ( male ) contact incorporated ..... PM , LPM , GPM , SPM , PMK
- Receptacles with socket ( female ) contact incorporated ..... RF , RF kaku , CRF , RBF
- Adapters with socket ( female ) contact incorporated ..... AdF , AdF(F) , Ad(F)F , AdFK , Ad(F)FK , GAdF , GAd(F)F

\* The S Type of [ NCS ] and [ NWPC ] Series in all shapes of PF, RM, AdM, etc. is indicated simply by P, R, Ad, etc. with the contact shape symbol omitted.

( Plugs : PF → P , Receptacles : RM → R , Adapters : AdM → Ad , Adapters with flange : AdM(F) → Ad(F) )

\* Only with [ NCS ] and [ NWPC ] Series, the adapters with flange are designated by the contact symbol placed before (F).  
Example: AdF(F)

※ Caution: The S Type and the G Type cannot be coupled.

Inserting or pulling out the connector in conduction is very dangerous. Be sure to turn off the power in advance.

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

# NCS Series

Non-waterproof

RoHS

Safety standard certified products available

## Overview

- Basic type of round metal connectors.
- Representative series that has proven performance in various indoor manufacturing equipment over a long period of time.
- High resistance to starting current and load current, enabling these connectors active in various manufacturing equipment.

## Feature

RoHS	RoHS Directive compliant
Waterproof	Non
Lock method	Thread lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Simple structure, easy handling and robust.</li> <li>○ Ten shell sizes and many connector shapes available for a wide variety of applications.</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ &lt; CSA NRTL/C &gt; standard certified connectors available. ( CSA : C22.2 No.182.3 UL : 1977 )</li> </ul> <p><small>Note: The specifications of safety standard certified connectors are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( p.129 ).</small></p>
Cable termination	Soldering

## Characteristics

Insulation resistance , Withstand voltage , Contact resistance p.10

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

[ When inserting or extracting the connector, do not turn the connector body. ]

# NCS Series

## Product No. designation

**NCS - 25 ■ - P M**

① ② ③ ④ ⑤ ⑥ ⑦

- ① Series designation
- ② Shell size
- ③ Number of contacts
- ④ Shell shape
- ⑤ Contact shape < Pin ( male ) contact : M , Socket ( female ) contact : F >  
The S Type of NCS Series in all shapes of PF, RM, AdM, etc. is indicated simply by P, R, Ad, etc. with the contact shape symbol omitted.
- ⑥ Additional symbol (-CH) 《 Required only for Shell size 16 》
- ⑦ Safty standard specification( < CSA NRTL/C > )  
 《 Required only when safty standard is to be specified. 》 For applicable products, see p.129.

## Cable termination : Soldering

## Material and Finish

	Material	Finish
Shell	Zinc alloy or brass ( partially aluminum alloy )	Chrome plating Special treatment Tin-cobalt plating ( Shell size 16 only )
Insulator	Synthetic resin	—
Contact	Copper alloy	Shell size 14 , 16 , 25 , 30 : Nickel plating Shell size 40 , 44 , 50 , 54 , 60 , 64 : Silver plating Shell size 30 ( Number of contacts 7H , 13 ) : Gold plating

## Temperature tolerance level

-40°C to +120°C

## Exclusive tools ( optional ) : Contact wrench, soldering iron tip set

The contacts of rated current 80 A or over are constructed for removal from the insulator.  
 For soldering, remove the contact with a contact wrench.

### 《 Types of contact wrenches 》

**80A Contact Wrench**

Used for:

- NCS · NWPC-502 / 542
- NCS · NWPC-503 / 543
- NCS · NWPC-604 / 644

**150A Contact Wrench**

Used for:

- NCS · NWPC-602 / 642
- NCS · NWPC-603 / 643

### 《 Soldering iron tip set 》

Usable soldering iron 200 W  
 Iron tip inserting diameter φ 16 mm or over  
 Iron tip temperature setting 420°C to 450°C

Set name \* A set of iron tip and heat insulator.

For 80A contact → SS80-KB

For 150A contact → SS150-KB

They are also available individually.

For 80A contact

【 Iron tip → SS80-K 】 【 Heat insulator → SS80-B 】

For 150A contact

【 Iron tip → SS150-K 】 【 Heat insulator → SS150-B 】

### 【 80A Contact Wrench, 150A Contact Wrench 】

One tool is usable for installation and removal of a male and female contact.

# NJC Series

NJC

Non-waterproof

RoHS

Safety standard certified products available

## Overview

- Connectors designed in accordance with JIS C 5432.
- A large selection of products with a large number of derivatives added.
- A variety of products certified by safety standards having proven performance in a wide range of applications including semiconductor equipment and various measuring instruments.

## Feature

RoHS	RoHS Directive compliant
Waterproof	Non
Lock method	Thread lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Die cast shell with zinc alloy or aluminum alloy.</li> <li>○ Smooth coupling thanks to employment of 5-key system guide.</li> <li>○ Installation in a small space enabled by use of the L za.</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ JIS C 5432 compliant connectors available.</li> <li>○ UL • CSA standard certified connectors available. ( UL : UL1977 CSA : C22.2 No.182.3 )</li> <li>○ Safety standard certified connectors available. ( EN61984 compliant, TÜV certified )</li> </ul> <p><small>Note: The specifications of safety standard certified products are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( pp.127 and 130 ).</small></p>
Cable termination	Soldering

## Characteristics

Insulation resistance , Withstand voltage , Contact resistance p.38

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

Cable termination	Soldering

## Characteristics

Insulation resistance , Withstand voltage , Contact resistance p.46

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

## Insertion

Align the plug and the guide of the mating connector ( receptacle/adapter ) and push in straight.

**Caution: When inserting, do not turn the coupling nut.**

## Extraction

With the coupling nut turned CCW 45 degrees in the arrow direction, extract the connector.

**Caution: When extracting, do not turn the end bell.**

# NWPC Series

Waterproof equivalent to IP-X6

Safety standard certified products available

RoHS

### Overview

- Waterproof connectors based on NCS Series.
- Shell treated by brass + chrome plating.
- Robust and highly resistant to salt damage to make these connectors suitable for a wide variety of fields including civil engineering and construction machines , emergency power supply systems and ships.

### Feature

RoHS	RoHS Directive compliant
Waterproof	Waterproof connector 【 Waterproof function equivalent to IP-X6 when coupled 】
Lock method	Thread lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Shell of brass treated by chrome plating to offer superior corrosion resistance.</li> <li>○ Cable draw-out part provided with cable clamp to ensure firm cable holding ( Size 14 excluded ).</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ &lt; CSA NRTL/C &gt; standard certified connectors available. ( CSA : C22.2 No.182.3 UL : 1977 )</li> </ul> <p><small>Note: The specifications of safety standard certified products are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( p.129 ).</small></p>
Cable termination	Soldering

### Characteristics

Insulation resistance , Withstand voltage , Contact resistance , Waterproof p.60

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

[ When inserting or extracting the connector, do not turn the connector body. ]

**Product No. designation**

**NWPC - 25**  **- P M**

①      ②   ③   ④   ⑤   ⑥   ⑦   ⑧

- ① Series designation
- ② Shell size
- ③ Number of contacts
- ④ Shell shape
- ⑤ Contact shape < Pin ( male ) contact : M , Socket ( female ) contact : F >  
The S Type of NWPC Series in all shapes of PF, RM, AdM, etc. is indicated simply by P, R, Ad, etc. with the contact shape symbol omitted.
- ⑥ Symbol indicating cable packing size. 《 Plug & adapter require symbol to be specified. 》
- ⑦ Additional symbol (-CH) 《 Required only for Shell size 16 》
- ⑧ Safety standard specification ( < CSA NRTL/C > )  
 《 Required only when safety standard is to be specified. 》 For applicable products, see p.129.

**Cable termination : Soldering**

**Material and Finish**

	Material	Finish
Shell	Brass	Chrome plating Partially Tin-cobalt plating ( Shell size 16 only )
Insulator	Synthetic resin	—
Contact	Copper alloy	Shell size 14 , 16 , 25 , 30 : Nickel plating Shell size 40 , 44 , 50 , 54 , 60 , 64 : Silver plating Shell size 30 ( Number of contacts 7H , 13 ) : Gold plating
Packing	Synthetic rubber	—

**Operating temperature range**

-40°C to +85°C

**Exclusive tools ( optional ) : Contact wrench, soldering iron tip set**

The contacts of rated current 80 A or over are constructed for removal from the insulator.  
 For soldering, remove the contact with a contact wrench.

《 Types of contact wrenches 》

**80A Contact Wrench**

Used for:

- NCS · NWPC-502 / 542
- NCS · NWPC-503 / 543
- NCS · NWPC-604 / 644

**150A Contact Wrench**

Used for:

- NCS · NWPC-602 / 642
- NCS · NWPC-603 / 643

《 Soldering iron tip set 》

Usable soldering iron 200 W  
 Iron tip inserting diameter φ 16 mm or over  
 Iron tip temperature setting 420°C to 450°C

Set name \* A set of iron tip and heat insulator.

- For 80A contact → SS80-KB
- For 150A contact → SS150-KB

They are also available individually.

- For 80A contact
  - 【 Iron tip → SS80-K 】 【 Heat insulator → SS80-B 】
- For 150A contact
  - 【 Iron tip → SS150-K 】 【 Heat insulator → SS150-B 】

**【 80A Contact Wrench, 150A Contact Wrench 】**

One tool is usable for installation and removal of a male and female contact.

	Withstand voltage ( V r.m.s. )	1,000			
	Wire size ( mm <sup>2</sup> )	1.25	0.75		

Note-1 : For the limit operating voltage, see p.131.

# NWPC Series Shell Size 25

Note: We show sizes by the nominal "G(PF)" of parallel pipe threads. p.135  
 The waterproof of the conduit installation part depends on the conduit connecting components to use.

For the plug and adapter, be sure to select □ (cable packing symbol).

## Table □

Shell size	Symbol □	Outer diameter of cable used
25	7	φ 6.5 to φ 8.0
	9	φ 8.1 to φ 10.0
	11	φ 10.1 to φ 12.0
	13	φ 12.1 to φ 14.0

In order to secure the intended waterproof function, a cable to be used for the plug/adapter should have an appropriate specification and structure.

■ indicates the number of contacts. The conductor cross sectional area is less than the following value.

Shell size	Number of Contacts	2	3	4	5	6	7
25	Contact arrangement <When viewed from the pin (male) contact coupling side>						
	Rating	250V 10A				250V 5A	
	Limit operating voltage (Note-1)	400V				300V	
	Withstand voltage (V r.m.s.)	2,000				1,800	
	Wire size (mm <sup>2</sup> )	2				1.25	

Note-1 : For the limit operating voltage, see p.131.

Note: We show sizes by the nominal "G(PF)" of parallel pipe threads. p.135  
The waterproof of the conduit installation part depends on the conduit connecting components to use.

For the plug and adapter, be sure to select □ ( cable packing symbol ).

### Table □

Shell size	Symbol □	Outer diameter of cable used
25	7	φ 6.5 to φ 8.0
	9	φ 8.1 to φ 10.0
	11	φ 10.1 to φ 12.0
	13	φ 12.1 to φ 14.0

In order to secure the intended waterproof function, a cable to be used for the plug/adapter should have an appropriate specification and structure.

■ indicates the number of contacts. The conductor cross sectional area is less than the following value.

Shell size	Number of Contacts	2	3	4	5	6	7	8	
25	Contact arrangement <When viewed from the pin (male) contact coupling side>								
	Rating	250V 10A						250V 5A	
	Limit operating voltage (Note-1)	400V				300V			
	Withstand voltage ( V r.m.s. )	2,000				1,800			
	Wire size ( mm <sup>2</sup> )	2						1.25	

Note-1 : For the limit operating voltage, see p.131.

**Table**

Shell size	Symbol <input type="checkbox"/>	Outer diameter of cable used
30	9	φ 8.0 to φ 10.0
	11	φ 10.1 to φ 12.0
	13	φ 12.1 to φ 14.0
	15	φ 14.1 to φ 16.4
	17	φ 16.5 to φ 18.0

In order to secure the intended waterproof function, a cable to be used for the plug/adapter should have an appropriate specification and structure.

■ indicates the number of contacts. The conductor cross sectional area is less than the following value.

Shell size	Number of Contacts	2	3	4	5	6	8
30	Contact arrangement <When viewed from the pin (male) contact coupling side>						
	Rating	250V 15A				250V 10A	250V 5A
	Limit operating voltage (Note-1)	400V				—	300V
	Withstand voltage ( V r.m.s. )	2,000				1,800	
	Wire size ( mm <sup>2</sup> )	2				1.25	

Note-1 : For the limit operating voltage, see p.131.

For the plug and adapter, be sure to select □ (cable packing symbol).

### Table □

Shell size	Symbol □	Outer diameter of cable used
30	9	$\phi 8.0$ to $\phi 10.0$
	11	$\phi 10.1$ to $\phi 12.0$
	13	$\phi 12.1$ to $\phi 14.0$
	15	$\phi 14.1$ to $\phi 16.4$
	17	$\phi 16.5$ to $\phi 18.0$

In order to secure the intended waterproof function, a cable to be used for the plug/adapter should have an appropriate specification and structure.

■ indicates the number of contacts. The conductor cross sectional area is less than the following value.

[ ] : Gold plating contact

Shell size	Number of Contacts	2	3	4	5	6	7	7H	8	13

# N J W Series

N  
J  
W

Waterproof equivalent to IP-67

Safety standard certified products available

RoHS

## Overview

- Waterproof connectors based on NJC Series.
- As with NJC Series, a wide variety of types available.
- Proven performance in outdoor installations such as surveillance cameras, construction machines and outdoor measuring equipment.

## Feature

RoHS	RoHS Directive compliant
Waterproof	Waterproof connector 【 Waterproof function equivalent to IP-67 when coupled 】
Lock method	Thread lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Die cast shell with zinc alloy or aluminum alloy.</li> <li>○ Smooth coupling thanks to employment of 5-key system guide.</li> <li>○ Installation in a small space enabled by use of the L za.</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ UL • CSA standard certified connectors available. ( UL : UL1977 CSA : C22.2 No.182.3 )</li> </ul> <p><small>Note: The specifications of safety standard certified products are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( p.128 ).</small></p>
Cable termination	Soldering

## Characteristics

Insulation resistance , Withstand voltage , Contact resistance , Waterproof p.92

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

# NAW Series

Waterproof equivalent to IP-67

Safety standard certified products available

RoHS

Quick lock

- Overview**
- Metallic type of quick lock waterproof connectors.
  - Robust assured by employment of a metallic shell.
  - Suitable for use in civil engineering & construction machines and other various types of machinery.

<b>Feature</b>	RoHS	RoHS Directive compliant
	Waterproof	Waterproof connector 【 Waterproof function equivalent to IP-67 when coupled 】
	Lock method	Quick lock
	Features of mechanism/material	<ul style="list-style-type: none"> <li>○ Die cast shell with zinc alloy.</li> <li>○ Smooth coupling thanks to employment of 5-key system guide.</li> <li>○ Installation in a small space enabled by use of the L za.</li> </ul>
	Standards	<ul style="list-style-type: none"> <li>○ UL • CSA standard certified connectors available. ( UL : UL1977 CSA : C22.2 No.182.3 )</li> <li>○ &lt; CSA NRTL/C &gt; standard certified connectors available. ( CSA : C22.2 No.182.3 UL : 1977 )</li> </ul> <p><small>Note: The specifications of safety standard certified products are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( pp.128-129 ).</small></p>
	Cable termination	Soldering

**Characteristics**

Insulation resistance , Withstand voltage , Contact resistance , Waterproof p.103

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

**Insertion**

Align the plug and the guide of the mating connector ( receptacle/adapter ) and push in straight until it clicks in place.

**Caution: When inserting, do not turn the lock nut.**

**Extraction**

Extract the connector with the lock nut turned in the arrow direction 30 degrees CCW for Size 16 and 45 degrees CCW for Sizes 20 & 24.

**Caution: When extracting, do not turn the end bell.**

Cap p.102 • L za p.91

For the plug and adapter, be sure to select □ (cable packing symbol).

### Table □

In order to secure the intended waterproof function, a cable to be used for the plug/adapter should have an appropriate specification and structure.

Shell size	Symbol □	Outer diameter of cable used	Normal products		Safety standard	
			Standard	K Type	Standard	K Type
16	5	φ 4.0 to φ 4.8	●	—	●	—
	7	φ 5.7 to φ 6.8	●	●	●	—
	8	φ 6.9 to φ 7.9	●	●	●	—
	9	φ 8.0 to φ 9.4	●	●	●	—
11	φ 9.5 to φ 11.0	●	●	●	—	

■ indicates the number of contacts.  
The conductor cross sectional area is less than the following value. However, for safety standard certified products, use a cable having a value shown on p.129.

Shell size	Number of Contacts	3	5	8
16	Contact arrangement <When viewed from the pin (male) contact coupling side>			
	Safety standard (Note-1)	CSA NRTL/C		—
	Rating (Allowable current for signals)	125V		—
		10A	5A	[3A]
	Withstand voltage (V r.m.s.)	1,500	1,000	500
	Wire size (mm <sup>2</sup> )	1.25	0.5	0.3
Remarks	—		For signals	

Note-1 : Specified separately. For safety standards, see p.129.

[ ] : Gold plating contact

Note: We show sizes by the nominal "G(PF)" of parallel pipe threads. p.135  
 The waterproof of the conduit installation part depends on the conduit connecting components to use.

Cap p.102 • L za p.91

For the plug and adapter, be sure to select  (cable packing symbol).

# NAW Series

## ◆ [PCa] Plug cap

Caps used for plugs. Used to protect the contact part when they are not coupled with a receptacle/adaptor.

Shell size	Designation	Standard dimensions				
		A	B	C	D	E
16	NAW-16-PCa	25	φ 23	φ 19	160	φ 21
20	NAW-20-PCa		φ 28	φ 22.3		
24	NAW-24-PCa	26.5	φ 32	φ 27.3	165	φ 24

## ◆ [RCa] Receptacle cap

Caps used for receptacles. Used to protect the contact part when they are not coupled with a plug.

Shell size	Designation	Standard dimensions			
		A	B	C	D
16	NAW-16-RCa	30.5	φ 25	150 (※ 1)	3.45 Hole
20	NAW-20-RCa	32	φ 28.5		
24	NAW-24-RCa		φ 34		

(※ 1) Length 70 mm also available. ( Example : NAW-20-RCa L70)

## ◆ [RCa • 2] Receptacle rubber cap

Caps used for receptacles. Used to protect the contact part when they are not coupled with a plug.

This is a flange packing one piece type and the flange packing part is installed between the flange of the receptacle and the mounting panel.

The flange packing part is water tight. The cap is not water tight.

Shell size 16 NAW only

Shell size	Designation
16	NAW-16-RCa • 2

## ◆ [AdCa] Adapter cap

Caps used for adapters. Used to protect the contact part when they are not coupled with a plug.

For adapters with flange, RCa may also be used.

Shell size	Designation	Standard dimensions			
		A	B	C	D
16	NAW-16-AdCa	30.5	φ 25	160	φ 21
20	NAW-20-AdCa	32	φ 28.5		
24	NAW-24-AdCa			φ 34	165

( Waterproof ) No trace of water exposure after being kept at a water pressure of 40 kPa for 24 hours in the coupled state in its normal state of use.

# N R W Series

Waterproof equivalent to IP-67

Safety standard certified products available

RoHS

Quick lock

## Overview

- Made of resin and light weight. Quick lock system to make these connectors most suitable for portable equipment.
- Proven performance in outdoor measuring equipment, semiconductor equipment, temporary equipment for events, etc.

## Feature

RoHS	RoHS Directive compliant
Waterproof	Waterproof connector 【 Waterproof function equivalent to IP-67 when coupled 】
Lock method	Quick lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Shell made of weather-resistant, high-strength plastic.</li> <li>○ Light weight and sturdy.</li> <li>○ Installation in a small space enabled by use of the L za.</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ UL • CSA standard certified connectors available. ( UL : UL1977 CSA : C22.2 No.182.3 )</li> <li>○ Safety standard certified connectors available. ( EN61984 compliant, TÜV certified )</li> </ul> <p><small>Note: The specifications of safety standard certified products are slightly different from those of standard products. For the rated voltage, current and cable conductor cross sectional area, refer to A List of Standards Acquired ( pp.128 and 130 ).</small></p>
Cable termination	Soldering

## Characteristics

Insulation resistance , Withstand voltage , Contact resistance , Waterproof p.112

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

## Insertion

Align the plug and the guide of the mating connector ( receptacle/adapter ) and push in straight.

**Caution: When inserting, do not turn the coupling nut.**

## Extraction

With the coupling nut turned CCW 45 degrees in the arrow direction, extract the connector.

**Caution: When extracting, do not turn the end bell.**

( Waterproof ) No trace of water exposure after being kept at a water pressure of 40 kPa for 24 hours in the coupled state in its normal state of use.

# NEW Series

Waterproof IP-67

Safety standard certified products available

RoHS

Quick lock

## Overview

- Safety standard certified, waterproof connectors based on NRW. Certified by UL • CSA standards also.
- Grounding of prioritized contact structure to make these connectors suitable for use in a wide variety of fields including semiconductor equipment and various outdoor equipment.

## Feature

RoHS	RoHS Directive compliant
Waterproof	Waterproof connector 【 Waterproof function IP-67 when coupled 】
Lock method	Quick lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Protection circuit structure: Ground contact of sequence structure. ( prioritized contact )</li> <li>○ Shell made of weather-resistant, high-strength plastic.</li> <li>○ Light weight and sturdy.</li> <li>○ Installation in a small space enabled by use of the L za.</li> </ul>
Standards	<ul style="list-style-type: none"> <li>○ Safety standard certified connectors available. ( EN61984 compliant , TÜV certified )</li> <li>○ UL • CSA standard certified connectors available. ( UL : UL1977 CSA : C22.2 No.182.3 )</li> </ul>
Cable termination	Soldering

## Characteristics

Shell size	Contact	Number of contacts

- ⑥ Symbol indicating cable packing size. 《 Plug & adapter require symbol to be specified. 》

All connectors are UL • CSA , TÜV certified. Not necessary to specify a standard by a product name. For safety standards, see pp.128 and 130.

## Cable termination : Soldering

## Material and Finish

	Material	Finish
Shell	Synthetic resin	—
Insulator		
Contact	Copper alloy	Silver plating
Packing	Synthetic rubber	—

## Operating temperature range

Shell size	Number of Contacts	Operating temperature range	Upper limit of ambient temperature at rated current ( Note )
20	3	-25°C to +85°C	+80°C
24	3		+74°C
	4		+80°C
28	4		+67°C
	8		+77°C

( Note ) Max.ambient temp. at rated current  
( Based on TÜV certification test results )

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

## Insertion

Align the plug and the guide of the mating connector ( receptacle/adaptor ) and push in straight.

**Caution: When inserting, do not turn the coupling nut.**

## Extraction

With the coupling nut turned CCW 45 degrees in the arrow direction, extract the connector.

**Caution: When extracting, do not turn the end bell.**

# NT Series

Waterproof equivalent to IP-X6

RoHS

### Overview

- Waterproof and oilproof connectors for machine tools.
- Safety design with ground contact for a wide variety of machines including various molding machines.

### Feature

RoHS	RoHS Directive compliant
Waterproof	Waterproof connector 【 Waterproof function equivalent to IP-X6 when coupled 】
Lock method	Thread lock
Features of mechanism/ material	<ul style="list-style-type: none"> <li>○ Made of aluminum for light weight and robust.</li> <li>○ Use of NBR packing for high oil resistance.</li> <li>○ Safety design with ground contact.</li> </ul>
Cable termination	Soldering

### Characteristics

Shell size	Contact	Insulation resistance ( M Ω )	Contact resistance ( m Ω )	Withstand voltage ( V r.m.s. )
50	4	DC 1,000V 5,000 min.	3 max.	3,000
	10			2,500
	12			
	15			

( Waterproof ) No trace of water exposure after being tested to the protection degree 6 in the coupled state in its normal state of use.

The pin contact type has an **exposed electrode**. If it is used on the [ power supply ] side, it may cause **electric shock** or **short-circuit accidents**. To prevent such accidents, use the socket contact type on the [ power supply ] side and the pin contact type on the [ equipment ] side.

### 【 CE Marking 】

The CE Marking applies to finished products and devices to indicate that they comply with the European safety standards. This CE Marking is not applicable to connectors that are electrical & mechanical components.

### 【 EU RoHS 】

The compliance of EU RoHS subject ten substances (mercury , lead , hexavalentchrome , cadmium , PBB ,PBDE , DEHP , BBP , DBP , DIBP ) enacted from July 2019 will correspond from production in July 2018.

### 【 RoHS Directive 】

The RoHS Directive has been established by the EU ( European Union ) with an objective to protect human health and define collection and treatment of electrical and electronic equipment that does not affect environment by unifying laws and regulations concerning the restriction of use of harmful substances in electrical and electronic equipment among EU member countries.

The Chinese version RoHS Directive that has come into force in the People's Republic of China covers the same substances as the EU-RoHS Directive but there are some differences such as the obligation of indication of information about contained substances.

Our RoHS Directive compliant product types are those that are compliant with the EU-RoHS Directive, but not with the Chinese version RoHS Directive.

# A List of Standards Acquired

## UL • CSA certified products 【 Non-waterproof 】

Applicable standard: UL standard UL1977

The UL standard is a safety assurance standard released by the most famous private testing laboratory (UL) in the U.S., that is intended to eliminate the risk of fire and personal accidents caused by electrical equipment. Thus, the UL certified products are considered to be reliable and usable safely by customers. Our file No. is E117868.

Applicable standard: CSA standard C22.2 No.182.3

The CSA standard is a safety standard in Canada applicable to electrical equipment and machinery. In Canada, it is required that electrical machinery and equipment that are connected to the power supply for use conform to the CSA standard.

The U.S. and Canada have concluded a mutual recognition agreement and the UL standard and the CSA standard are treated equivalent. Also the UL standard and the CSA standard are allowed for mutual recognition and the following list of standard certified products includes the products that have been recognized by the UL by use of the CSA standard and the products that have been recognized by the CSA by use of the UL standard. Please note that depending on differences of manners of acquiring certification, markings on products may differ.

# Explanation of Terms

• Shell size

We use the outer diameter (  $\phi d$  [ mm ] ) of the panel inserting part of the receptacle to indicate the shell size.

Example : NCS-25 ( Shell size )  
 $\phi d$

• "Rated voltage" "Limit operating voltage"

The "rated voltage" is the voltage defined by the technical standards in the Electrical Appliances and Materials Safety Act in order to eliminate variation in performance by manufacturers and the "limit operating voltage" is the voltage that indicates the performance that can be exhibited by the products of Nanaboshi Electric Mfg.

Both of them are continuously usable voltages and we show the same value for both of AC and DC.

• Protection degree( JIS C 0920 , EN / IEC 60529 )

The degree of protection against the entry of foreign solid objects such as dust and dirt and the ingress of water, which is verified by standardized testing methods. This protection degree is designated by the form of "IP □■ ". A figure of degree of protection against the entry of foreign solid objects is shown in □ and a figure of degree of protection against the ingress of water is shown in ■ .

If there is no need of specification, an alphabet "X" is used.

Example: IP67, IPX7

Tests are applicable only to assigned degrees and the products of degree 7 do not necessarily satisfy the tests of degree 6 or below.

First characteristic digit		
IP	Protection of electrical equipment	Protection of persons
0	Entry of foreign solid objects ( No protection )	Access to hazardous parts ( No protection )
1	Diameter $\geq$ 50mm	Back of hand
2	Diameter $\geq$ 12.5mm	Finger
3	Diameter $\geq$ 2.5mm	Tool
4	Diameter $\geq$ 1.0mm	Wire
5*	Dust protected	Wire
6	Dust tight	Wire

★ Category 1: Test with the inside under negative pressure.  
Category 2: Test with the inside not under negative pressure.

Second characteristic digit	
IP	Protection of electrical equipment
	Harmful ingress of water
0	( No protection )
1	Vertically falling
2	Falling ( at an degree of 15° )
3	Spraying
4	Splashing
5	Jetting
6	Powerful water jets
7	Temporary immersion ( Watertight )
8	Continuous immersion ( Submersible )

※ The testing method of numeral 8 is agreed between the parties concerned.

## NCS-25 · 30-RBP

( mm )

Series	Shell size	Shape	$\phi A^{+0.5}_0$	Panel thickness
NCS	25	RBP	28.5	2 to 3
	30		33.5	2 to 4

Recommended tightening torque of mounting nut : 2 N · m

### Precautions for installing the waterproof type

In order to secure water tightness, the installation part must be treated as below:

1. When the panel thickness is 10 mm or more, tap the panel directly and ensure that the thread hole does not penetrate from the installation panel surface to the back.
2. When the installation panel is thinner, either use a commercially available seal washer or mold the mounting nut part with resin.

※ The inside of the panel should be water tight.

# Parallel Pipe Thread Conversion Table

JIS B 0202 ( Parallel pipe thread )		↔	JIS C 8305 ( Rigid steel conduits )
Specified in ISO	Not specified in ISO		Thick steel conduit pipe thread
G <sup>1</sup> / <sub>2</sub>	PF <sup>1</sup> / <sub>2</sub>		CTG16
G <sup>3</sup> / <sub>4</sub>	PF <sup>3</sup> / <sub>4</sub>		CTG22
G1	PF1		CTG28
G1 <sup>1</sup> / <sub>4</sub>	PF1 <sup>1</sup> / <sub>4</sub>		CTG36
G1 <sup>1</sup> / <sub>2</sub>	PF1 <sup>1</sup> / <sub>2</sub>		CTG42

For designation of pipe threads, we use the expression of parallel pipe thread "G(PF)". For the thick steel conduit pipe thread ( CTG ) also, the above table can be used without problem.
