- Package Options Include Plastic and Ceramic DIPs
- Dependable Texas Instruments Quality and Reliability

description

These devices contain two independent 4-input expanders. The '60 perform the Boolean function X = ABCD when connected to X and \overline{X} inputs of SN5423/SN7423, SN5450/SN7450, or SN5453/SN7453. The 'H60 performs the same function when connected to X and \overline{X} inputs of SN54H50/SN74H50, SN54H53/SN74H53, or SN54H55/SN74H55.

The SN5460 and SN54H60 are characterized for operation over the full military temperature range of $-55\,^{\circ}\text{C}$ to $125\,^{\circ}\text{C}$. The SN7460 and SN74H60 are characterized for operation from $0\,^{\circ}\text{C}$ to $70\,^{\circ}\text{C}$.

- NOTES: 1. Connect to X input of '23, '50, or '53 circuit.
 - 2. Connect to X input of '23, '50, or '53 circuit.
 - 3. Connect to \overline{X} input of 'H50, 'H53, or 'H55 circuit.
- 4. Connect to X input of 'H50, 'H53, or 'H55 circuit.

Resistor values shown are nominal.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage, VCC (see Note 5)	• • • • • • • • • • • • • • • • • • • •	7 V
Operating free-air temperature range:	SN54'	- 55°C to 125°C
	SN74'	
Storage temperature range		65°C to 150°C

NOTE 5: Voltage values are with respect to network ground terminal.
