

**Silicon-Power-Z-Diodes  
(non-planar technology)**

**Silizium-Leistungs-Z-Dioden  
(flächendiffundierte Dioden)**

|   |  |
|---|--|
| Maximum power dissipation<br>Maximale Verlustleistung | 12.5 W                                 |
| Nominal Z-voltage – Nominale Z-Spannung               | 3.9...200 V                            |
| Metal case – Metallgehäuse                            | DO-4                                   |
| Weight approx. – Gewicht ca.                          | 5.5 g                                  |
| Standard polarity:                                    | Cathode to stud / Gewinde              |
| Index R:  | Anode to stud / Gewinde (e.g. ZX ...R) |
| Standard packaging: bulk                              |  |
| Standard Lieferform: lose im Karton                   |  |

Standard Zener voltage tolerance is graded to the international E 24 (~5%) standard.  
 Other voltage tolerances and higher Zener voltages on request.  
 Die Toleranz der Zener-Spannung ist in der Standard-Ausführung gestuft nach der internationalen Reihe E 24 (~5%). Andere Toleranzen oder höhere Arbeitsspannungen auf Anfrage.

| Maximum ratings   | Grenzwerte           |           |                       |
