The U32F series is a longer life version of the industry standard U32D specifically designed to provide the ripple current capability and long life required for the highest reliability inverter applications. The U32F has an endurance rating of 5,000 hours at +105°C or 20,000 hours at +85°C with the rated ripple current applied. These capacitors are available with a variety of high current English or Metric thread terminals. Mounting options include a three-footed clamp or a bottom stud. Custom designs are available upon request.
