

ZR Series (Radial type)

Disk type general use ZR type (Low voltage) is for protection of electronics and control equipments from surge and noise.

1. Features

- Superior nonlinearity of voltage to maintain low limiting voltage.
- Symmetry V-I characteristics to be applicable for +/- surge and AC circuit.
- Small in size, high in surge endurance to be stable for repetitive surges.
- Quicker response and sharper cut-off compared with discharge type protector.
- Low temperature coefficient.
- Wide applicable voltage range.
- High reliability.

2. Application

- Protection of semiconductors from surge voltage.
- Protection of circuit and lines from induced lightning surge.
- Protection from relay noise.
- Voltage stabilization.

3. Qualification

MNR disk type is qualified for UL1414, 1449 and CSA C22.2, to be available for exporting. Also international standard, ISO-9001 qualification is obtained.
